

# Public Transport Infrastructure Asset Management

## Trends and Challenges

Conference, Brussels, 14 November 2017

Is it possible to **cost-efficiently and sustainably manage public infrastructure assets** integrating planning, design, construction, maintenance, rehabilitation, renovation and reconstruction? What are the current scientific tools or methods to **manage asset portfolios with diverse structures** such as bridges, roads, tunnels, waterways, railroads, .... with various ages, states or damages?

ULB BATir department (Civ, Arch and Urban Engineering) together with the VUB, ADEB-VBA, Febelcem, Vlaamse Waterbouwers and ERF are kindly inviting **practitioners, public administrations, contractors, engineers, architects, researchers and students** to make this event a fruitful one.
